

SEMESTER'S PROJECT

Semester's projects are made during the summer or winter semester (March to June or October to February) and are a good exemple of how to manage industrial and research projects with short deadlines.

PROJECT'S DEADLINES

	In the semester preceding the project :	During the project :
Subject choice.	10th – 11th week	
Possible preparatory works: obtain documentation, order components, plan printed circuits for testing, make contacts with specialists, etc.	During holidays between the two semesters	
Project's beginning: Fix detailed objectives and project plan with your supervisor.		1st week
Intermediate presentation (taken direction, objectives) 15 minutes presentation + 10 minutes (questions).		<i>Around the 7th-8th week</i>
Preliminary report 1 copy to your supervisor (not binded).		<i>Around 2 weeks before the final presentation</i>
Demonstration definition Discuss with your supervisor.		<i>Around 2 weeks before the final presentation</i>
Final report 1 binded copy to your supervisor abstract in .doc + .pdf to your supervisor.		<i>Discuss the deadline with your supervisor: has to be ready for the presentation</i>
Final presentation with demonstration 20 minutes presentation + 10 minutes (questions).		<i>End of the project</i>

Italic deadlines : the precise deadlines will be communicated by mail during your project.
